5 Ahmed Onibudo,  
Off Adeola Hopewell St.,  
Victoria Island,  
Lagos.

Dear Sir/Ma,

I am humbly writing to express my interest in the 2019 Management Trainee Program currently advertised by your organization on [hotnigerianjobs.com](http://hotnigerianjobs.com). I am a versatile and professional mathematics graduate with a wide ranging experience in a variety of Mathematical related areas including Computer Programming and Operation Research seeking to combine academic achievements and my fast-paced numerical skills in any challenging role within the financial/digital sector.

As a recent graduate, my professional job experience is limited. However i believe that you will verify that I exhibit intelligence, common sense, initiative, maturity, stability, and that I am eager to make positive contribution to your organization.

During my final year project, I used a powerful and effective numerical method to solve an eccentric equation. I worked with my project supervisor who spend time in fine-tuning my project. I also asserted to my project supervisor and his colleagues that I was the legitimate writer of the project. This required a 15-minute presentation of complex information in a clear and concise manner. This gave me valuable experience in presentation techniques, and to manage my time effectively. I learnt to communicate ideas and difficult concept effectively, write a report and to work to deadlines.

The attached resume can serve to provide you with greater details of my background and what I have to offer. Thank you for your time and consideration. I would welcome the opportunity to be interviewed by your selection panel and look forward to working with you in the near future.

Yours Faithfully,  
Blessing Makaraba.
